3D SketchUp is a 3D modeling and drafting program developed by Google and launched in 2008. SketchUp is a direct competitor to Google's free 3D modeling application, SketchUp Pro and is based on a workflow similar to Google SketchUp. AutoCAD also has a beta-level of 3D modeling, with additional features such as 3D drawing and editing. Training The Autodesk Training Portal provides comprehensive training materials, videos, software and books on Autodesk products. History AutoCAD started as AutoCAD Drafting System in 1989. In the beginning, it was a combination of AutoCAD R14 and AutoCAD LT (via a TCP/IP driver). This was later followed by a series of drafts and releases of AutoCAD until version 13, the first release that was supported directly on the PC. Some versions were limited to use in certain operating systems, and with certain editions of Windows. AutoCAD and AutoCAD LT were later renamed to Autodesk AutoCAD and Autodesk AutoCAD LT, respectively, in 1999. The most recent version of AutoCAD, 2007, was updated in 2008 to include the ability to work with the newer formats such as DWG and DXF. The most recent release of AutoCAD LT is Autodesk AutoCAD LT 2008. AutoCAD was the first (and remains the only) 3D CAD program to use native support for 3D. AutoCAD LT 2008 introduced a 3D application that can read DWG files (both AutoCAD 2003 and DWG file formats). CADMAN-3D is a free 3D modeling application that uses the same 3D interface as AutoCAD LT 2008, but it only supports 3D. AutoCAD is licensed in three editions: Standard, Pro, Architectural. AutoCAD LT is licensed in Standard and Architectural. AutoCAD was originally released for the Intel 80286 processor, and then for the 80386 processor. Later versions included the ability to run on the Pentium and AMD K6 processors. With AutoCAD 2008, AutoCAD LT 2008 and AutoCAD 2009 each supported two versions of 3D, which were named differently from the preceding version, as well as including several new features. The first release of AutoCAD in 1989 supported only AutoCAD LT, the first release of AutoCAD LT in 1991 ca3bfb1094

A new Markup Import and Markup Assist feature allows you to import feedback into your drawings more quickly than ever before. Using real-time feedback, you can instantly incorporate feedback from a variety of sources into your CAD designs. Plus, a simple check mark indicates to AutoCAD that you've reviewed a user's suggested changes, so there are no additional steps required to keep your drawings up-to-date. - Import feedback from printed paper or PDFs - Add changes to your drawings automatically - A check mark indicates that you've reviewed a user's suggested changes - Works with 2D and 3D drawings - Includes keyboard shortcuts (video: 1:57 min.) The Markup Import and Markup Assist feature lets you import feedback from a variety of sources, such as: - Individually printed 2D drawings - Printed paper - PDFs Importing printed 2D drawings is faster and more efficient than converting PDFs or other 3D files. As you import feedback from paper, PDFs, and other sources, you can check multiple boxes per drawing. This allows you to add comments from more than one source. During the import process, AutoCAD displays information about the selected drawing and any feedback it has received. You can also see information about the drawing's feature set, including which drawing templates are available. When you select a drawing for a new import, AutoCAD displays options for the selected template. - Automatically checks off any boxes you select to confirm that you have reviewed feedback from a user - Displays AutoCAD information about the selected drawing - Displays AutoCAD information about the drawing's feature set - Includes keyboard shortcuts (video: 2:04 min.) If you've already started a 3D drawing, you can continue adding feedback from a paper drawing or PDF by pressing the F6 key (Windows) or ?-F (Mac) to start a new import of printed 2D drawings. From the Markup Import and Markup Assist task pane, select a 2D print. From the drop-down menu, select Import 2D Drawing (video: 1:42 min.) to start an import. Markup Assist When you're finished importing feedback, mark up the selected drawing and return to the Task Pane to review the feedback
