“To date, our football simulation engine has been built around a handful of player templates that we have painstakingly recreated to better represent the characteristics and styles of play of many of the world’s best players,” explained PES Lead Producer Aleksander Mauer. “We’ve always strived to provide players with the most authentic gameplay experience and our new engine technology will help deliver this on PS4. Now, our players can be more intuitive and intelligent on the pitch.” The ‘Pro Mode’ and ‘Be a Pro’ options within the game have also been improved to take full advantage of the technology. “More game features have also been added to ‘Be a Pro’ mode,” noted Mauer. “Players can take on the role of a coach and get behind the operation of an entire team. Controls have been expanded to give the player more control and visual feedback. We’ve also added new training drills, so you can bring a virtual ball into a virtual classroom and work with your team on their feet.” Check out the full press release below. Fifa 22 Product Key will be available for Xbox One, PlayStation 4, Xbox 360, PlayStation 3, the PC and Wii U. The PC edition, was announced last week. FIFA Mobile: EA Access members can download FIFA Mobile on the Xbox One console and Android devices for free. EA Access members can download FIFA Mobile on the PC with an EA Origin Access membership. The base game of FIFA 20 will also be available on all platforms as well as FIFA Ultimate Team on PlayStation 4, Xbox One and Nintendo Switch. Features ‘Superstar Creator’ Introducing “HyperMotion Technology,” a breakthrough in artificial intelligence that allows developers and players to mold players to their own likeness and abilities. “Superstar Creator” with “HyperMotion Technology” will give players a chance to create a player who might not be in their likeness. From creating the shape of their player with a 3D avatar, to replacing key stats such as speed and agility, players can finally change the facts on the pitch. With “Superstar Creator,” players can decide the exact abilities of their player. Now bring to life your football vision with the new ‘Superstar

FIFA is the world’s leading football videogame franchise. The flagship FIFA is one of the most successful sports videogames ever created, with over 100 million copies sold worldwide. FIFA is a global phenomenon that captures, entertains and connects fans with football. Why make FIFA 22? The FIFA community is among the most passionate in gaming, and one of the most dedicated to FIFA. FIFA 22 harnesses the passion and creative energy of the FIFA community, while bringing the game closer to the real thing. Development story The development team at EA Canada brings the most innovative and best-received features of FIFA 19 to FIFA 22. These include Player Intelligence, the Club Experience, and live - now and season - matchday experience. The only decision not up for discussion was to remain true to our vision that is FIFA. The philosophy of rewarding our fans and

providing them with the ultimate gaming experience has never changed. Player Intelligence Player Intelligence is the collective effort of more than 25 game development cycles, to improve our game for both the seasoned FIFA gamer and the player who simply enjoys the game and playing it how they like to. Player Intelligence for FIFA 22 is implemented on all 22, but most widely seen are: 'Control Intelligence', which is a feature of the ball AI that more effectively dictates how the ball behaves in different situations on and off the field 'The AI team', which, by simulating how players make decisions, makes the game more fun and interesting for all players to play. This includes improving how players run with the ball, making skilled passes and plays, and evaluating the situations in which they need to break and turn faster. Since the introduction of the ball AI in FIFA 19, player positioning has been a key factor in deciding how and where the ball goes. FIFA 22 is the first to use Player Intelligence to drastically improve ball movement in gameplay. This is achieved by enhancing how the ball behaves. When facing the goal and by positioning himself, players use their technical skills to control the flight of the ball, which is currently way too often unpredictable and is largely out of their control. We have made the ball more predictable, thus enabling the player to better understand and control the ball, and do so more effectively. The changes to the ball AI increase ball control in the following situations: When the ball leaves the player's hands faster than planned. This is very often bc9d6d6daa
