Rolemaster Classic: Fantasy Weapons is a roleplaying game system for the fantasy role-playing game Rolemaster. It includes the roleplaying game Rolemaster Classic as well as the ruleset Rolemaster: Fantasy Weapons for fantasy roleplaying game play using Fantasy Grounds. History: The conversion from Rolemaster Classic to Fantasy Grounds was started by the creator of the roleplaying game Rolemaster Classic himself, Manfred Scheunemann (see credits list for reference). During the three years of the project the author spent quite a lot of time testing the compatibility of the rules with the game engine. Here is a list of problems that the author encountered while converting the system into the new framework. Important Note: Please refer to the Fantasy Grounds documentation to understand the impact of a change (or set of changes) to a settings file. Each and every change to a rolemaster-game settings-file results in a new settings-file format. And many settings-file changes will result in modifications to any settings-file that uses the same settings-file. For each and every engine change that affects a settings-file all settings-files that have a settings-file that uses the same settings-file need to be updated by hand (and typically several, unless there is an automated mechanism available to do so). Please note that manual updates to settings-files will be necessary for each and every engine that the settings-file is tied to. The date when the updates are scheduled to be performed is at the discretion of the owner of the settings-file. This is the most important paragraph on this page: In the following tables, the numbers after "Engine" refer to the version of the game engine. "Version", on the other hand, is the number of the Rolemaster Classic ruleset version and is the number that is used for the Rolemaster Classic "Settings" table. The "Core" and "Classic" settings-files are based on the famous the Rolemaster Classic 1.51 ruleset. In order to compile the ruleset into a roleplaying game that is ready for use, the player must convert the ruleset to a Fantasy Grounds format. For example, many rules, such as Combat, have been rewritten and must be reflected in the appropriate rules. Conversion of the following tables into roleplaying game settings that could be used by a player require the following points: The conversion of the tables such as "Armor" and "Goods" has been very difficult due to the fact

As the Crimean uprising began, several hundred commandos swept into the Black Sea resort of Yalta, evicting Russian tourists and setting up base. The Kremlin claims it was in response to the referendum in Crimea on Sunday that voted to join Russia; their implication is that Crimea was already a Russian region and their legitimacy was confirmed by the vote. Whatever the truth, that kind of action simply wouldn't happen in a Western democracy. In the U.S., the weekend's events were dismissed as attempts to "remake" the United States as another republic in the European sphere of influence. This is nonsense. The Ukrainians are not a minority, and their protest began as part of a broader movement against the corrupt and oppressive post-Soviet regime. Russians, given the regime's violent treatment of any dissent, are unlikely to regard Ukrainian rebels with a great deal of sympathy either, but in the end there was a referendum. Would anyone have accepted such a vote, though, if the officials running the vote were thugs and thugs alone? On Monday, the Ukrainian prime minister, Arseniy Yatsenyuk, was essentially expelled from parliament; he made a brave, if clumsy, attempt to appeal to the demonstrators. An estimated 12 people were killed during the protests, including two from the side of a police armored personnel carrier. The president, Viktor Yanukovich, has now declared a state of emergency, and his government is preparing to crack down on the opposition. This is where I start getting worried

, a fairy ballgown made from Aesculus (European beech), color-weaver reeds, a netted froth of chaff and foam, is one of a series of compositions the artist makes in her studio, an ode to the beauty and mystery of nature. "I want to invite us all in. My inspiration comes from the top-down layers of the past," she says. Color-weaver reeds are used for making culpa, a traditional method of weaving used in tribal Mennonite communities in Hungary and Kosice, Slovakia. "My interest in these historical weaving techniques comes from life experience," she says. In 2001 she took up back-to-the-land traditional weaving to make a series of artisan skirts using cloth gleaned from her homestead and doilies. Those are now made commercially in Hungary and the United States.Offer Price: HOW WE CAN HELP We List ALL Home and Land! How we can help you We specialize in solving one of life's biggest problems: the need to sell a home. "I needed to sell my home quickly, and I needed to sell it 'as is." Sandy responded with a business model that allowed me to get the highest possible price for my home, without the hassle, without the hassle of making repairs, without the hassle of selling a home all "as-is." The results were eye-opening. After one month, I sold my home for more than I had originally planned to pay. Over the next year, Sandy's consultations were invaluable when I decided to sell my home again, this time for a higher price—and sales were twice as fast as my first attempt.
