Mafia II Fling Trainer

i have a few suggestions on how to improve the trainer to make it easier to use, and some of my ideas may seem kinda odd, but i hope you get the idea, and there are some other trainers that i like that have similar features to this trainer, but i can't remember the names of them. the trainer is pretty cool but it needs a few things. first off i need some help. i have a super numpad but it isn't recognized. the trainer i made for mafia ii fling doesn't work, so i need to get the trainer that has the cheatkeys for that. so how do i do that? second, the cheat keys that you can access don't seem to do anything, and i think it's because i have to press z. so would it be possible to add some sort of cheat keys with each state so you don't have to hold down z? i really don't know much about trainers so i hope you can help. i would like the option to make a trainer that utilizes the 'cheat' feature. for example, the trainer i have made already for mafia ii fling doesn't work, so i need to get the trainer that has the cheatkeys for that. so how do i do that? second, the cheat keys that you can access don't seem to do anything, and i think it's because i have to press z. so would it be possible to add some sort of cheat keys with each state so you don't have to hold down z? i really don't know much about trainers so i hope you can help. i've tried a few trainers on hotkeys. the first trainer i tried had two cheat hotkeys. one was for the cheat and the other for the trainer. i ended up running the trainer without the cheat hotkey. another trainer had a cheat hotkey that would enable the cheat and a trainer hotkey that would run the trainer, this also didn't work for me. 5ec8ef588b
