What's New In Bimoid Messenger?

Bimoid Messenger is a simple and easy to use application for sending instant messages between Bimoid users. Every Bimoid user with a compatible client has a public user account. For registering with Bimoid Messenger you have to use your Bimoid user account. Your address on your Bimoid website will be shown in the registration pop-up window of Bimoid Messenger. You can add friends with one click when you send a private message to a user. You can then see all the messages between you and your friends in the Bimoid Messenger user

interface. Users can also send private messages to each other directly from the user interface. The connection between your Bimoid account and your Bimoid Messenger account is automatically set up when you begin using the program. Bimoid Messenger uses Bimoid's Bim-protocol, which provides easy and secure communication with a lightload of programming complexity. Features of Bimoid Messenger: * The application allows both text and graphic messages * The Bimoid Messenger user interface can be fully hidden or displayed completely * The user interface supports 24 languages: English, German, French, Italian, Dutch, Spanish, Russian, Czech, Hungarian, Polish, Norwegian, Turkish, Swedish, Croatian, Slovenian, Polish, Finnish, Hungarian, Romanian, Bulgarian, Slovak * Security is guaranteed because of the Bim-protocol * You can test the connection before you send your first private message * For advanced users (admins) a strong admin module has been developed. * With this module you can build your own Bimoid Messenger servers for global Bimoid-based communities. * User accounts are stored in a central Bimoid server and can be deleted * Support for multiple simultaneous users * Support for groups * Support for password changes * Support for broadcast messages * Support for privacy settings * Support for logging * Support for the forumlist users * Support for the Bim-gossip users * Support for the Bim website * Support for all Bimoid public servers * Support for the sending of in-game events (levels, items) *
