Because images are layered in Photoshop, it is easy to get lost in the different elements of your work. Lightroom 5 helps keep you on top of each element by collapsing the layers. For this article, I want to take a look at some of the new features that are available in Lightroom 5. I have also included some helpful links for how to use Lightroom 5 to your best advantage. Newly released Photoshop recovers missing layers, which allows you to work on a layered image without accidentally deleting any edits. If you know how to define an area that you will not be working on, you will not accidentally lose your edits when you want to move or copy a layer. But, if you do have a particular area you know you will be working in, you will be able to collapse all the layers, so you don't have to worry about losing any edits. Lightroom Import Utility saves you from the hassles of importing images one by one, as you can now import a handful of photos at once. Another feature that is quite impressive is the ability to export images at four sizes, allowing you to easily adjust your photos to fit on websites without having to scale them down. In the past I have worried about potential conflicts between a recent software update and an older version. Now, thanks to the new Camera Raw plug-in, Lightroom, the only tool you need for both shooting and editing, I can use my iPad Pro to edit photos and videos without ever having to leave the edit room. If I were a casual user, particularly one that relies on a tablet to view and edit images, this might be the one I would go with. And, for many casual users, that's what it is. It is for the long term. I find that it would be worth it to get this if I were to switch to the Apple iPad Pro, which I do not yet intend to do. It is tablet-style, and easy to use with both hands. If I were to switch, then I would probably be switching to a Windows tablet. Any of the Windows tablets would either be a lower spec or a higher cost. I wouldn't go with a Surface, because that is not my preference. I normally go with devices that have a keyboard. I am an Apple fanatic. Galaxy Note 9 users out there cringe when I mention Adobe Photoshop because they should know better. It is not as good as Photoshop Elements, it is not as good as Photoshop, and it does not have the features they use on a day-to-day basis. It is a low-cost option that does the job well. And, it does so, in many cases, cheaper than alternatives. I feel you get what you pay for – it's not a complex solution, and this can be used by people for whom Photoshop is a barrier. It is a veteran's program and a beginner's program. If you are looking for a new tablet for reference purposes, then I would suggest the Lenovo X1 Carbon 80QE-A .

Using the Brush Tool (B), apply any of the blending options to blend features between your different layers. Try this on different images or text layers on individual or several layers to create a unique effect! A week ago, I started this new blog for my series The Explosion, which starts this Friday. As a teaser to begin the series, I am starting it off with my new favorite commercial for the first installment of the series. In this commercial, you enter an apartment. There is a car on the street, a couple walking, a guy on a bicycle, and a woman talking on the phone. When the door opens you see just

how many people are in the apartment. A month ago, I had a self-imposed deadline to make it to New York City by June. It was a great time for grownup stuff like sleeping and working in an office, but this trip had a bit of a family twist to it. My mom, dad, and my son Max decided to go to New York for a couple of reasons: the sun was about to come back out, Max was getting back into school, and my sister was going to be in town for a long weekend. I have already posted on the reasons why Max's school was coming to an end, but I'm going to skip those for a minute to focus on what they were up to while I was gone. Max's Voice The first week of school went great. I was able to take him for a longer day of speech therapy (which he had been going to a week) and he loved it. He was excited to start school and was at 6th grade page with a plethora of new friends. One of his favorite things to do was play chess at recess. He also said he got no sleep because of the new class schedule at summer school, but I have a feeling that was a bit of an understatement. Max's Voice Let me tell you, you do not want to mess up a kid's week if you know what is good for you (which I think I will forever remember as the Seven-Day Rule). His week started on a Monday, and as a result I had to take an early meeting the next morning. I'll spare you the details of my meeting, but suffice to say that I was extremely fortunate to have the meetings all covered. Max came home from school on Friday night and I played Pokémon Go with him, had dinner, and went to bed on Sunday. Max's Voice Saturday was Max's birthday (yay!), so after we all got dressed for the day, we went out to eat at a pizza place that Max's dad and I had never been to before. When we were inside the restaurant, in walked Nick, a co-worker from a software company that both Nick and I work for. Max was excited and I'm sure Nick was a little-too-obviously thrilled to see his kid. We ate a nice meal, had a cake, and then got a little kayaking.
