Worksharing using the Workgroup Sharing service, an Active Directory (AD) server, or a local instance of the Winspool Workgroup Server. AutoCAD 2010 and later, as well as AutoCAD LT 10 and later, can read DWG files created by other programs. AutoCAD's DXF format allows importing, exporting, and converting geometric data. DXF files are a standard among CAD applications, and can be manipulated by any DXF application, including general purpose software such as SolidWorks. DXF files are also the standard for AutoCAD's native collaborative applications, including "AutoCAD WebView", the web interface for AutoCAD, which allows access to AutoCAD from any web browser, and "AutoCAD 360", a web browser that acts as a mobile version of AutoCAD. AutoCAD allows editing of DXF files on the command line using the command xinput. Collaborative editing AutoCAD can be set up in various modes to allow multiple users to edit the same drawing. Real-time drawing AutoCAD's real-time drawing mode (RTD) enables users to draw objects in parallel and then synchronize and merge their drawings. The ability to use AutoCAD this way allows users to work on a drawing while creating a

number of other elements on the drawing. This is similar to the way a user might draw a bill of materials (BOM) in a traditional BOM design software. This mode is not available in AutoCAD LT. Fully interactive Fully interactive (FDI) drawing mode is an add-on which adds interactions and automation capabilities to AutoCAD drawing. FDI is a commercial add-on product which competes with other commercial add-on products such as the DraftSight add-on product from AutoDesk. Comparison to other CAD systems According to the Software Evaluation Center, AutoCAD is in the top 1% of CAD software for architecture. The 2010 version of CAD Systems Evaluation Center list also includes Cadalyst's database of features and usability evaluations of CAD systems. According to Cadalyst, "AutoCAD has emerged as the CAD system to beat in the past year, but by how much will depend on whether users can decide which other solutions meet their particular needs." A survey released in the summer of 2008 by a committee of architects and engineers found that 44% of respondents had used some other CAD ca3bfb1094
