Stardock ObjectDock is a docks for Windows, designed to work with Windows. Field of the invention The present invention relates to a common mode choke coil, which functions as a passive filter in a differential signal transmission line. 2. Description of the Related Art FIG. 7 illustrates one example of a conventional common mode choke coil. A pair of spiral-shaped coil conductors 81 are placed in case 83, with their spiral portions confronting each other. The coil conductors 81 are respectively connected at the ends of the substrate spiral conductor thereof to connector terminals 82, so that the coil conductors 81 provide mutually confronting spiral paths for a magnetic flux. The coil conductors 81 are electrically connected in a series connection of two resistors 84 and 85. In the conventional common mode choke coil shown in FIG. 7, the central gap between the spiral portions of the coil conductors 81 is not fully utilized so that the magnetic flux generated by an applied external magnetic field passing through the coil conductors 81 cannot effectively flow in a predetermined direction. This leads to a deterioration in the filter performance of the coil. Android Studio: Error with save as apk I am getting an error when I try to save my code as apk.
