sesspaphpag [url= avg iMGSRU Access to the internet continued to improve  
during the coverage period, until the February 2021 coup. As of 2021, 43 percent of  
the population used the internet, an increase of two and a half million people since  
the beginning of 2020. 1 The speed and quality of service have improved in recent  
years due to the launch of fourth-generation (4G) mobile networks in 2017, 2 and  
international bandwidth reached 2,036 Gbps in 2020. 3 However, penetration overall  
remains lower than average for the Asia-Pacific region, 4 and internet speeds are  
slower than average, particularly for fixed-line connections. 5 The Ministry of  
Transport and Communications (MoTC) Universal Service Strategy for Myanmar  
201822 aimed to reach 95 percent of the population with mobile broadband services  
and 99 percent of the population with basic mobile voice services by 2022. 6 At the  
end of the coverage period, achieving this goal appeared unlikely, especially in light  
of the February 2021 coup. Furthermore, the government improved security during  
the coverage period, which improved at-speed service, and enhanced internet  
broadband speeds. However, penetration overall remained lower than average for  
the Asia-Pacific region, 4 and internet speeds are slower than average, particularly  
for fixed-line connections.
